

GROUP 4 - SPORTS, EXERCISE SCIENCE

Date syllabus ends	Review Start Date	If formal assessments are completed early, how will students be engaged until the end of the term?
April 26th	April 29th	Formal assessments will be completed but the students will still have material to be covered so they will be engaged that way. For the review period, we will use the syllabus, as well as each unit review to help identify key concepts and content that need to be reviewed in depth. The boys will spend some time reviewing the unit reviews and identifying any concepts that they either have a) mastery over b) feel relatively confident in, c) low confidence. We will then prioritize the low confidence concepts and spend class time reviewing them. I will also reteach certain concepts in which the class as a whole struggled with (eg. Sliding Filament Model of muscular contraction).
